

FOR FRESHMAN STUDENTS GENERALLY AND FRESHMAN STUDENT-ATHLETES ON ATHLETICS AID*

PART I-A: Standardized Test Scores, by Gender

Calculate and provide the average (mean) standardized test scores for all entering freshman students and freshman student-athletes who received athletics aid* (include nonqualifiers who were ineligible for athletically related aid) during the three most recent academic years, by gender. Report all scores as either recentered SAT or ACT sumscores. Individual student-athlete scores should be converted using the table provided on Page 22 before the average (mean) test scores are calculated. If possible, this same procedure should be used in converting the scores of freshman students generally. Otherwise, the average score for freshman students generally may be converted using the table provided on Page 22. List the most recent academic year's data first and include all freshmen students entering the institution during the year.

		Gender							
		Male students		Male student-athletes		Female students		Female student-athletes
